

How to connect to eduroam network - android

Set up with the geteduroam app

Open **Google Play**, search for **geteduroam**, and install the app.

Open the app, search for **zvolen**, and select **Technical University in Zvolen**.

When prompted, enter your username in the form **username@tuzvo.sk** and your password (username=UIS login name, password=same as for UIS). Then tap **Log in**.

Cancel Log in

When asked to save the eduroam Wi-Fi profile, tap **Save**. Once Wi-Fi is configured, you can close the app.

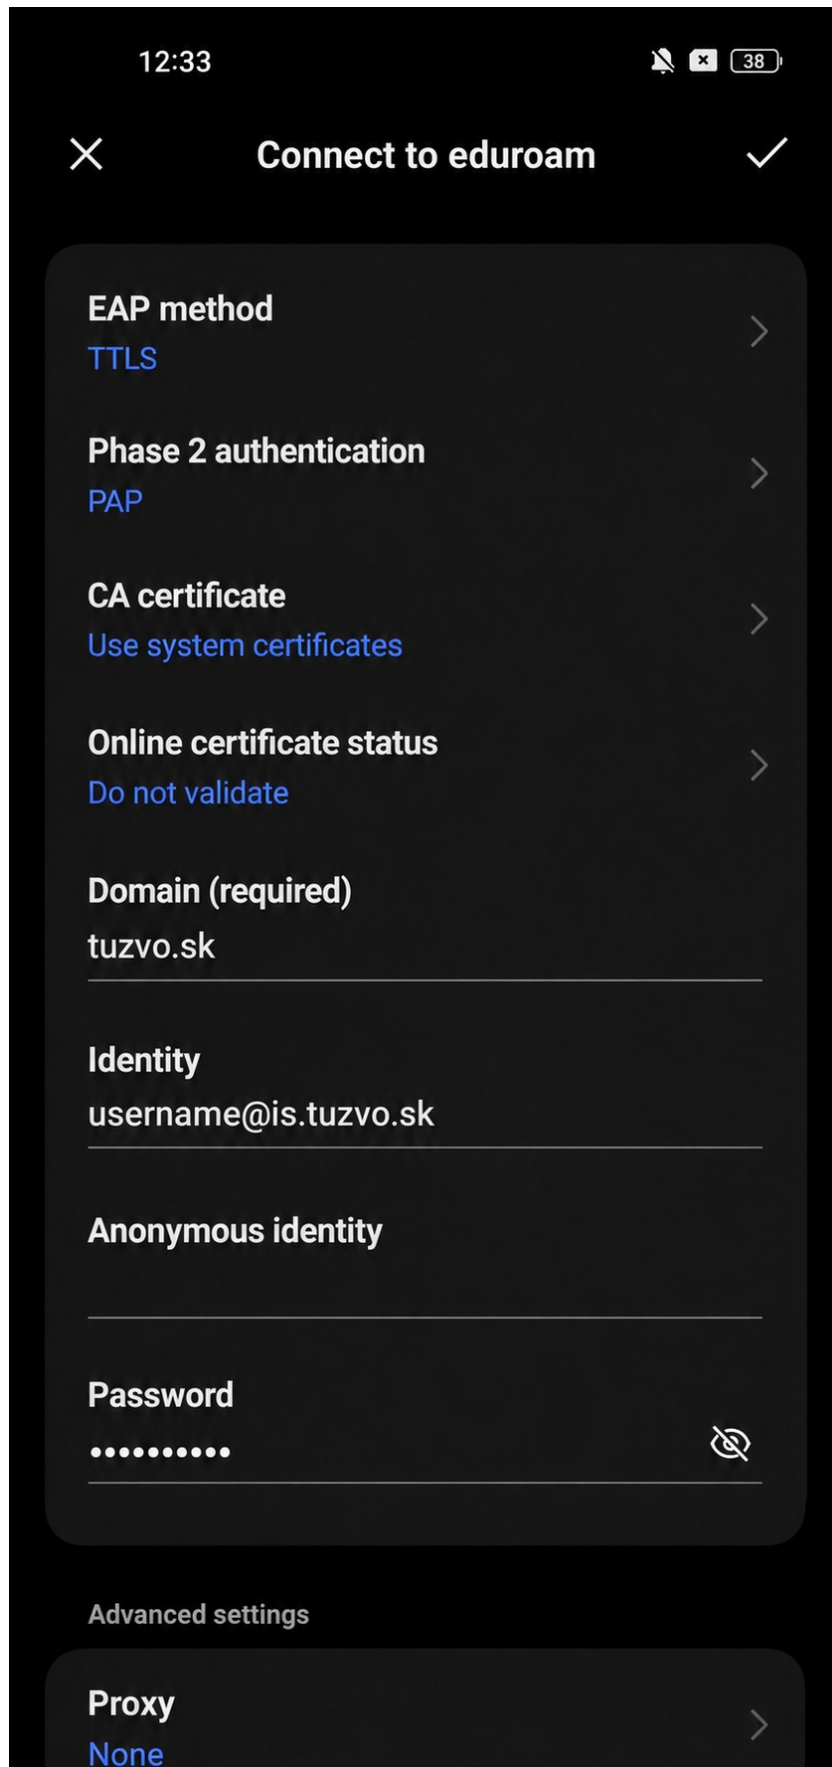

Manual setup:

Open your phone's **Settings**, tap **Wi-Fi**, and select the **eduroam** network.

Set **EAP method** to **TTLS** and **CA certificate** to **Use system certificates**. Enter **tuzvo.sk** as the domain, then your username in the form **username@is.tuzvo.sk** and your password (username=UIS login name, password=same as for UIS). Confirm the settings to connect.
